SUMMARY

Backend Software Engineer with 1.5+ years of professional experience building scalable, AI-powered systems in Python and Django. Led the full architectural migration of a legacy .NET enterprise platform to Django + DRF serving millions of records, now being packaged as a white-label B2B SaaS. Experienced in distributed systems, workflow automation, and integrating ML/NLP into production environments. Passionate about reliability by design and data architectures that make hard problems tractable.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL
Frameworks & Libraries: Django, Django REST Framework, Django Unfold, React, .NET (legacy migration)
Databases: PostgreSQL
Cloud & DevOps: Google Cloud Platform (GCP)
Workflow & Messaging: Camunda 7, Kestra, n8n, Make, NATS (pub/sub)
AI / ML: NLP, Gemini AI, LangChain, Sentiment Analysis, Session Transcription
Other: REST APIs, WebRTC, JWT, OAuth, Microservices, AI/ML Integration

EXPERIENCE

Software Engineer

June 2025 – Present

Techwards

Karachi, Pakistan (Remote-Ready)

- Led architecture and full migration of a legacy .NET 5.0 enterprise platform to Django + DRF, redesigning the PostgreSQL schema from scratch with a relationship-driven model that guarantees data correctness across millions of records.
- Transformed the client's internal tool into a white-label B2B SaaS product by architecting for multi-tenancy and scalability, enabling significantly faster workflows for both ops and dev teams.
- Built and maintained a Django Unfold admin panel with role-based access control, dynamic bulk actions, and advanced filters; deployed and managed on GCP.
- Integrated the platform with external services (YouTube, Bunny, file handling APIs) and mentored junior engineers through code reviews and onboarding.

Associate Software Engineer

February 2025 – June 2025

Techwards

Karachi, Pakistan

- Owned backend engineering for a large-scale enterprise cybersecurity platform (NDA); built automated exception-resolution pipelines using Kestra and Camunda that self-resolve recurring failures without manual intervention.
- Integrated NATS as a pub/sub messaging layer for real-time, asynchronous communication across distributed microservices, ensuring reliable event propagation at enterprise scale.
- Orchestrated business workflows via Camunda 7 and Kestra, exposing Django API endpoints for automated, event-driven process execution.

Full Stack Developer – Backend & AI Focus

August 2024 – Present

Nexus Academy

United Kingdom (Remote)

- Independently architected a student LMS from the ground up using Django REST Framework and React, owning the full backend architecture, API design, and PostgreSQL schema.
- Built real-time tutoring infrastructure using WebRTC with session recording and playback; secured via JWT and OAuth with multi-role access flows for students, teachers, and admins.
- Integrated AI-powered features: automated session transcription, intelligent note-taking, and an ML sentiment analysis module to evaluate student engagement and surface actionable insights for educators.

Data Analytics & Consumer Insights Intern

August 2024 – October 2024

Beats by Dre

New York, USA (Remote)

- Built a consumer insights pipeline scraping and cleaning large-scale Amazon review data, then applying NLP and Gemini AI to extract themes, summarise sentiment, and surface patterns across thousands of reviews.
- Delivered EDA and data visualisations that translated complex consumer feedback into actionable insights, directly informing brand strategy decisions.

EDUCATION

Bachelor of Science in Computer Science

2021 – 2025

National University of Computer and Emerging Sciences (FAST-NUCES)

Karachi, Pakistan

- Dean's List of Honors (multiple semesters) | Top Performing Candidate

CERTIFICATIONS

IBM Certified JavaScript Developer | Introduction to Data Analytics – IBM | Developing Front-End Apps with React | LangChain for LLM Application Development | Generative AI and LLMs: Architecture and Data Preparation
